It's your opportunity to take a **DRIVE** in classic, British Automobiles while supporting people living with ALS and their families. \$15 for 15 minute drive in your favourite Class British Automobile! \$1 per minute for additional time.

What Is ALS?

ALS (Amyotrophic Lateral Sclerosis) is a fatal disease that destroys the motor neurons. ALS takes away a persons ability to move, speak and eventually to breathe.

The ALS Society of New Brunswick and Nova Scotia provides much needed support and services to people living with ALS and their families such as the Equipment Loans Program.

People with ALS borrow much needed medical equipment such as breathing machines and wheel chairs at no cost to them. On average, people borrow around \$70,000 worth of equipment.
